Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. Cancelled.

2. Cancelled.

3. (Previously presented) The computer method of claim 32 wherein said ordering interface access providing step further comprises providing access to a customer order selector adapted to enumerate and quantify a subset of said electronic photographic images to be produced as said hardcopy renditions.

4. (Previously presented) The computer method of claim 32 wherein said ordering interface access providing step further comprises providing access to a customer proofbook adapted to store a subset of said electronic photographic images, wherein said customer proofbook persists between said remote accesses by said customer.

5. (Previously presented) The computer method of claim 32 wherein said server access providing step enables transmitting payment corresponding to production of said hardcopy renditions in response to notification from said financial institution.

6. Cancelled

7. (Previously presented) The computer method of claim 32 wherein said server access providing step enables receiving said electronic photographic images from a non-volatile digital media.

8. (original) The computer method of claim 7 wherein said non-volatile digital media is selected from the group consisting of magnetic and optical formats.

9.   Cancelled.

10.   (Previously presented) The method as in claim 33 wherein said translating comprises scanning a visual image into a digital storage format.

11.   (Previously presented) The method as in claim 33 wherein said fixing comprises using a digital camera to store said visual images therein.

12.   Cancelled

13.   Cancelled.

14.   (original) The method as in claim 12 wherein said displaying is in response to interactive selecting by said customer through said publicly accessible network.

15.   (Previously presented) The method as in claim 33 wherein said storing further comprises arranging said electronic photographic images according to an event and said displaying said electronic photographic images occurs selectively according to said event.

16.   (Previously presented) The method as in claim 33 wherein said displaying is followed by the step of electing a quantitative and qualitative assertion for at least one of said electronic photographic images.

17.   (original) The method as in claim 16 wherein said electing further comprises storing at least one of said electronic photographic images in an electronic proofbook.

18.   (original) The method as in claim 17 wherein said electronic proofbook is accessible only by said customer.

19.   (Previously presented) The method as in claim 33 wherein said receiving said order comprises a qualitative and quantitative election with respect to each of said electronic photographic images of said subset.

20.   (Previously presented) The method as in claim 33 wherein said storing is preceded by the step of remotely altering said electronic photographic images.

21.   Cancelled.

22.   Cancelled.

23.   (Previously presented) The computer method of claim 34 wherein said ordering interface access providing means further comprises means for providing access to a customer order selector adapted to enumerate and quantify a subset of said electronic photographic images to be produced as said hardcopy renditions.

24.   (Previously presented) The computer method of claim 34 wherein said ordering interface access providing means further comprises means for providing access to a customer proofbook adapted to store a subset of said electronic photographic images, wherein said customer proofbook persists between said remote accesses by said customer.

25.   (Previously presented) The computer method of claim 34 wherein said server access providing means further comprises means for transmitting payment corresponding to production of said hardcopy renditions in response to notification from said financial institution.

26.   Cancelled

27.   (Previously presented) The computer method of claim 34 wherein said server access providing means further provides means for receiving said electronic photographic images from a non-volatile digital media.

28. (original) The computer method of claim 27 wherein said non-volatile digital media is selected from the group consisting of magnetic and optical formats.

29. Cancelled.

30. (Previously presented) The method of claim 32 further including the step of providing access to stored images for allowing image editing.

31. (Previously presented) The method of claim 32 wherein said editing step includes one or more of the steps of categorizing, sorting and titling.

32. (currently amended) A computer method for storing and saving electronic photographic images comprising:

providing access to a server having picture memory adapted to store said electronic photographic images obtained by a photographer at [[a]] an ~~customer~~ event, an ordering interface and a communication link for allowing communication over a public network, said server providing access to said electronic photographic images stored in said picture memory by said photographer and customers of said photographer, said ordering interface further providing access to an image profiler only by said photographer and/or host of said event adapted to sequence and ~~label~~ caption said stored electronic photographic images for display to said customers of said photographer;

said server adapted to transact remote payment information with respect to a financial institution for verifying payment of an order placed by said customers of said photographer through said ordering interface; and

wherein said ordering interface is operable to be remotely accessed by said customer of said photographer over said public network using a browser for the purpose of ordering an image product with respect to said stored electronic photographic images.

33.   (Currently amended) A method of remotely uploading, storing, reviewing, and editing electronic photographic images on behalf of a customer comprising:

fixing visual images on a persistent medium obtained by a photographer at [[a]] an ~~customer~~ event;

translating said visual images into electronic photographic images;

transmitting said electronic photographic images to an order server;

sequencing and captioning said electronic photographic images by said photographer and/or event host for display to customers of said photographer;

storing said electronic photographic images on a memory at said order server for remote access by a remote customer of said photographer over a public network using a client browser;

displaying selected electronic photographic images from said memory to [[a]] said remote customer over said public network in accordance with the sequence and captioning;

receiving an order from said remote customer enumerating a subset of said electronic photographic images; and

producing a hardcopy rendition of said subset of electronic photographic images.

34.   (currently amended) A computer method for storing and saving electronic photographic images comprising:

means for providing access to a server having picture memory adapted to storing said electronic photographic images obtained by a photographer at ~~a customer~~ an event, an ordering interface and a communication link for allowing communication over a public network, said server accessed to said electronic photographic images stored in said picture memory by said photographer and customer of said photographer, said ordering interface further providing access to an image profiler only by said photographer and/or host of said event adapted to sequence and ~~label~~ caption said stored electronic photographic images for display to said customer of said photographer;

-6-

said server adapted to transact remote payment information with respect to a financial institution for verifying payment of an order placed <u>by said customer of said photographer</u> through said ordering interface; and

wherein said ordering interface is operable to be remotely accessed by said customer of said photographer over said public network using a browser for the purpose of ordering an image product with respect to said stored electronic photographic images.
